Cloud Databases

The fastest MSSQL Server
cloud databases

Get Microsoft SQL Server 2014 databases optimized for your enterprise applications with the reliability you expect.

Three plans to meet your specific needs

	Enterprise Starter	Enterprise Plus	Enterprise Platinum
Type	Intranet or basic website	Heavy-traffic websites Web applications	Heavy-load applications and websites
Performance index			
Maximum database size	10GB	100GB	1000GB
Description	Microsoft SQL Server 2014 Enterprise Edition High Availability Configuration 99.999% SLA	Microsoft SQL Server 2014 Enterprise Edition High Availability Configuration 99.999% SLA	Microsoft SQL Server 2014 Enterprise Edition High Availability Configuration 99.999% SLA

It's easy to start with our hourly pay-as-you-go option.
We offer more flexibility: pay only for the time you are running your database.

Five reasons to choose Blue Nova Technology, LLC cloud databases

1. Security

Our multi-tenant infrastructure guarantees secure access to your data with role-based access control (RBAC).

2. Reduce costs

The total cost of ownership of running your own Microsoft SQL Server infrastructure in the cloud is much higher than using a Database-as-a-Service.

3. Work smarter

Are you a DBA (database administrator)? Shorten the time you spend maintaining your database by moving it to the cloud.

4. High availability

One database instance is never enough to ensure business continuity. <company name> provides synchronous replication for all your database instances at no additional cost.

5. Continuous monitoring and maintenance

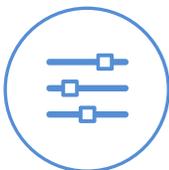

We have a team working around the clock to monitor and optimize your databases.

What to expect from our cloud databases

Performance

We use enterprise-grade hardware. All SSD SAN, Intel CPU, RAM and chipsets. DELL servers.

Simplicity

Easily provision and manage your databases using our Performance Cloud portal, API, or command line. Deploy in minutes.

Reliability

Ensure business continuity with our fully-redundant infrastructure. We've optimized database indexing, replication and backups.

Scalable

Scale your instance size limit up or down, ranging from 1GB to 1000GB (or even higher on request).

Always up.

Spend less time maintaining the infrastructure and more time focusing on your applications. Our monitoring and database specialists are available 24x7x365.

One-stop shop for all your cloud needs.

Use one single account with us to add Cloud Servers, Office 365, Hosted Exchange and much more services to your organization.
